

Senior Solidity Developer (Remote)

Cool Cats Group LLC are looking for a full-time experienced Senior Solidity Developer to join our expanding team.

Cool Cats Group LLC is one of the top NFT's in the space and is considered a Blue Chip NFT company. It is a leader in its field, bringing innovative utility and gamification to the NFT market. Launched in July of 2021, this is a fast growing and ever-expanding company filled with individuals who are passionate about the growth and expansion of the Cool Cats universe.

Cool Cats are a family friendly NFT with a focus on community and functionality. You will be working with a team of creative and driven individuals with a variety of skill sets. We value positive communication and collaboration within the team within an established remote working environment.

The right individual will have extensive experience writing high quality, secure and well tested Solidity contracts.

Experience with the design, testing, review, deployment, and interactions with smart contracts that hold material funds.

A deep understanding of the Ethereum Virtual Machine and the broad decentralized finance ecosystem.

As well as exceptional academics and/or track record through your career to date.

The role will include the following responsibilities:

- Taking ownership of projects and managing them until conclusion.
- Writing Solidity smart contracts, scripts that deploy and interact with smart contracts.
- Set and maintain efficient and secure development processes, ensuring the speed of development meets our goals without compromising on security
- Work extensively on the security of Cool Cats Group LLC solidity smart contracts through audits, testing, formal verification, q/a, etc.
- Contribute towards the hiring of further engineers
- Champion and embody the unique values and tone of Cool Cats Group LLC.

Desirable Skills

- 5+ years of experience in another programming stack or language
- Understanding of Ethereum scaling solutions (e.g. L2s and side-chains)
- Background in formal verification, mathematics, cryptography
- Experience implementing complex math in Solidity
- Knowledge and understanding of fundamentals of finance, particularly derivatives trading (interest rate markets)

We use the following software:

- Slack.
- Jira.
- Google Drive.
- Webstorm
- Github

Cool Cats Group LLC will offer the right candidate competitive market rates of pay with the possibility of bonuses and equity ownership in the company. We look forward to hearing from you and welcoming you to the team.
