Frontend React Developer (Remote)

Cool Cats Group LLC are looking for a full-time experienced Frontend React Developer to join our expanding team.

Cool Cats Group LLC is one of the top NFT's in the space and is considered a Blue Chip NFT company. It is a leader in its field, bringing innovative utility and gamification to the NFT market. Launched in July of 2021, this is a fast growing and ever-expanding company filled with individuals who are passionate about the growth and expansion of the Cool Cats universe.

Cool Cats are a family friendly NFT with a focus on community and functionality. You will be working with a team of creative and driven individuals with a variety of skill sets. We value positive communication and collaboration within the team within an established remote working environment.

The right individual will have at least three years front end development experience using React JS. Confident in producing clean code and experience with test driven design.

Experience with NFT's and/or a sound knowledge of Non-fungible Tokens is desirable.

The role will include the following responsibilities:

- Taking ownership of React based projects and managing them until conclusion.
- Production of frontend code / React.
- JSX.
- SCSS.
- Comfortable using Typescript.
- Producing clean code with test driven design.
- Champion and embody the unique values and tone of Cool Cats Group LLC.

Desirable Skills

- Experience and aptitude with web3 development.

We use the following software:

- Slack.
- Jira.
- Google Drive.
- Webstorm
- Github

Cool Cats Group LLC will offer the right candidate competitive market rates of pay with the possibility of bonuses and equity ownership in the company. We look forward to hearing from you and welcoming you to the team.
